

Partner Program

Resource Scheduler by PeopleCube is the industry leader for enterprise scheduling and resource management challenges in organizations of all sizes. Since 1989, PeopleCube has set the standard for developing logical, scalable, intuitive software solutions to help organizations effectively manage real, everyday, business scenarios. Our suite of eco-friendly

scheduling solutions has helped more than 7,500 customers worldwide to optimize their workspace and resources to improve productivity, increase revenue, reduce costs and help preserve the environment.

Resource Scheduler is becoming widely used for workspace management to facilitate office hoteling and carbon footprint monitoring - issues that are gaining great visibility among customers who are monitoring their corporate real estate expense.

Office hoteling provides organizations with an opportunity to promote telecommuting and minimize capital investments.

Carbon footprint monitoring is aided in many ways, including the opportunity to integrate with HVAC systems to control lights and temperature when the room is being used...and when it's not.

Finally, our exclusive partnership with Building Sustainability, Ltd. allows PeopleCube to offer carbon footprint monitoring and dashboard reporting in a way that sets us far apart from any competitor in the industry.

PeopleCube Partner Program

PeopleCube believes in partnering with organizations that share a common belief: optimize workspace and resources to improve productivity, increase revenue, reduce costs and help preserve the environment. PeopleCube recognizes that organizations with a wide variety of capabilities and industry experience offer different opportunities. As a result, we are open to partnering opportunities of all types: OEM, system integrator, value added reseller, and referral. The primary objective of the program is to extend each organization's value proposition, product portfolio, and business reach.

Our partners' products and services become solutions when integrated with PeopleCube software technology thereby enriching your end-users with innovative, reliable solutions that will help drive business achievement.

A few of the benefits PeopleCube can offer a partner include:

Targeted Marketing Support

- Strategic marketing resource materials
- PeopleCube press release and dedicated success story collateral
- Presentations and interactive Webinars

Effective Sales Tools Specific to Partners

- Competitive pricing and margin
